[1] Cost per Unit – Automatically calculated from previous data.

Cells are automatically shaded to show outliers (10% above and below fleet average).

[2] These numbers are an approximation calculated based on other data in the sheet, and are intended to help you identify outliers. These figures become more accurate with each fuel entry.

[3] Cells are automatically shaded to show outliers (10% above and below vehicle average).

[4] Cells are automatically shaded to show outliers (10% above and below vehicle average).

[5] Cells are automatically shaded to show outliers (7.5% above and below vehicle average).
